A canvass among the druggists of this place reveals the fact that Chamberlain's are the most popular proprietary medicines sold. Chamberlain's Cough Remedy, especially, is regarded as in the lead of all throat trouble remedies, and as such, is freely prescribed by physicians. As a croup medicine, it is also unex celled, and most families with young children keep a bottle always handy for instant use. The editor of the Graphic has repeatedly known Chamberlain's Cough Remedy to do the work after all other medicines had failed.—The Kimball S. D. Graphic For rale at 25 and 50 cents per bot-tle by A. F. Hargrave, Druggist.

BIG FIRES!

Great

Replenished—Food is Fuel for the Body.

pared to the raging fires of the sun A recent writer in one of our monthly

We all know that the human body is

if he has a layer of fat just beneath the skin, he has a medium which holds in the heat of the body, as a layer of wool does when placed on the outside of the skin. Persons who are plump in flesh do not shiver with every cool, invigorating breeze. Neither do they require so much food, for as the heat cannot escape so readily, so it is not necessary to add as much fuel. Plumpness means protection; defense against coughs and colds; shelter for an escape from neuralgia and scintica; a shield

coughs and colds; shelter for an escape from neuralgia and scintica; a shield to throw off nervous prostration; bet-ter scenrity from the germs of con-sumption; an escape from a thousand aches and pains which cling to a body that is poorly nourished. Plumpness is prosperity, thrift, good nature, hap-niness.

Scott's Emulsion of Cod-liver Oil with

Hypophosphites will not make you over-fat, simply plump, just about right. It puts that coat of fat over

emulsion in the world, that will stand the test of time as being a perfect in-separable emulsion. Ask your doctor.

journals, illustrates the enorme ournals, illustrates the enormous heat which the sun gives out, as follows: he says that if all the coal which exists

Fires Are Constantly Burning.

INHALATION. Still They Will Go Out in Time if Not

History records the occurrence of most disastrous fires. A few times our own country has been visited in this way with tremendous force. Yet how insignificant they seem when com-

GIA, AND ALL CHRONIC AND NEATON

Palen, is a scientific adjustment of the elenents of Oxygen and Nitrogen magnetize ne says that if all the coal which exists on this globe could be placed in one mass, and then immediately burned up, it would not produce as much heat as the sun throws off into space in one-tenth of a second. Of course, we and the compound is so condenced and made portable that it is sent all over the

cannot comprehend what this means. But there is another fire constantly burning, of which many of us are not aware, although we live very close to it. treated, and over one thousand physicians have us d it and recomend it-very signifiennt facts. warmer than the surrounding atmos-phere; while during cold weather the difference is very marked. What keeps the body warm? Because it is con-

the body warm? Because it is constantly burning up.

We replenish the fire in the stove by adding more coal or wood. The oxygen of the air unites with this fuel and heat is produced. The fuel for the body is our food; and the oxygen obtained from the air we breathe combines with it and heat is produced. This heat is constantly escaping from the skim. During summer we dress lightly to aid its escape. During winter we put on flannels, because wool is not a good conductor of heat, and will not allow it to escape so freely from the surface of the body.

If a person is plaunp in flesh, that is, if he has a layer of fat just beneath the skin, he has a medium which holds in the best of the body. postunite their na

tygen, is spurious.
